THE HISTORICAL MILESTONES

From 1922 to the present day, the milestones in the development of INTERTAN have been both its people and its expansion into new markets, which are always proof of its unrelenting passion for development, and the start of a new era, with new dynamics, challenges and opportunities.

Anastasios Taniskidis establishes the first individual traditional food industry, in the city of Chalkida in Greece.

The processing unit of salt from the natural sea salt lakes nearby (Alykes) develops.

INTERTAN enters the Food and Beverage packaging consumables market with the **Tani Professional** product range and a complete product line that covers the needs of the wholesale trade.

INTERTAN S.A. is founded

Intertan
— 1922 —

The Company begins its most significant cooperation in the Food & Beverages' sector, as **Nestlé** Distributor in Central Greece.

With the entry of the next generation, the **Taniskidis Bros Company** is founded, commencing operations in the Food & Beverages' distribution sector.

2015

The company introduces the **Tessera Sustainable Packaging** range for the first time to the market. A packaging line of products, inspired by nature, with a clear environmental orientation.

2026 is expected to mark a new milestone year, as the company's relocation to its new 90,000-sqm facilities is gradually completed—an area that enables INTERTAN to evolve into a logistics / distribution hub.

INTERTAN expands in the Industrial and Medical Equipment sector with the **Protect** range, and in the Retail sector with the **Tani Home** range.

2022

2025

INTERTAN is expanding its range by introducing a new product category: Detergents for professional spaces. With three product lines, it meets all the needs of wholesale customers with high-performance cleaning products.

At the same time, it enters the glass packaging sector with the **Tani Glass** brand.

2023

At the same time, it is beginning to introduce the idea of a children's partyware range, which will educate infants about environmental issues. Under the Tessera series, with the **Tessera 4 Kids brand**, a very interesting story begins...

2024

The company's ability to offer customised packaging solutions led to the addition of the **White Label** labeling service. The personalization capability now extends from the piece, to the pack and the case.

2026

New premises

Intertan
— 1922

90.000 m²

* The **new privately owned** facilities are located in the Ondathi area, a few kilometers outside Chalkida and close to the Ritsona Industrial Area.

ONE STOP SOLUTION

Intertan

— 1922 —

1

We travel the world to meet every need. With powerful bargaining power, we import more than **4,500 containers** annually.

2

We store and pack your orders in our new **90,000 sq. m.** customs bonded warehouse, which serves as a "hub" for transporting products from suppliers to customers around the world.

3

You create **mixed pallets** of packaging items of your choice. INTERTAN's vast portfolio features a rich codebook in a variety of designs and sizes.

4

One of the undoubted advantages of INTERTAN is its **fast delivery times**, so that all your needs can be serviced immediately.

Product Specifications: While we make every effort to provide accurate and up-to-date information regarding product specifications, descriptions, and features, please note that details may change without prior notice. We reserve the right to modify or discontinue any product, including its specifications, at any time. It is recommended to verify the information with our staff or contact us for the most current and accurate product details.

SUSTAINABLE PACKAGING SOLUTIONS FOR A SUSTAINABLE FUTURE!

Since 2015, sustainability has become the cornerstone of our corporate identity and a fundamental factor in our decision making when it comes to providing the right packaging solutions for food and beverage products.

TESSERA Sustainable Packaging® solves a wide range of packaging needs, with products that are recyclable and biodegradable through industrial composting.

RECYCLABLE

This term refers to products that can be recycled, i.e. reprocessed and reused as raw material for the production of products used for the same or a different purpose.

As a result, fewer new natural resources are wasted during their life cycle.

BIODEGRADABLE

This term is used to describe products which undergo biodegradation under the action of micro-organisms. This means that biodegradation can also be described as organic recycling.

Biodegradation takes place under specific-controlled conditions through

industrial or home composting, provided that the products are disposed of in appropriately labelled bins to be processed in industrial composting facilities or home composters and are eventually converted into harmless, natural elements such as carbon dioxide, water, salts, nutrients and biomass.

COMPOSTABLE

These are products which, through the industrial or domestic composting process, are converted into «compost» i.e. «natural fertiliser».

Depending on its quality and nutrients, compost can be used as a soil conditioner or fertiliser for various crops.

Personal Protective & Medical Equipment

Intertan S.A. presents its new product line Intertan Protect®, a complete offering in disposable Medical and Protective Equipment. This new category aims at top quality, credible solutions in the specialized industrial and medical fields.

The main product pillar in the line is the Intertan Protect® gloves, which adhere to the highest standards. Made from latex, nitrile and vinyl, they are available in various colours and sizes, so that they cover all professional or personal needs. Intertan Protect® gloves bear the respective CE certifications, which declare compliance with the European Regulations 2016/425 on Personal Protective Equipment (PPE) and/or 2017/745 on Medical Devices Regulation (MDR).

The Intertan Protect® line also includes a complete range of disposable medical and protective equipment, suitable for the industrial and medical fields, such as foot and sleeve covers, various types of cups, face masks, gowns and aprons. All the products in the range are certified according to the European Standards and bear all the required marks.
